Micah LaSala | Full Stack Developer

Raleigh, NC | (919) 438-2091 | mlasala45@gmail.com | LinkedIn | Portfolio

Professional Summary

Versatile developer with hands-on experience designing and building full-stack applications using technologies like Angular, Spring, React, Node.js, AWS, and PostgreSQL. Passionate about backend development, automation, and performance-focused systems. Demonstrated ability to independently manage technical projects, quickly adapt to business needs, and deliver high-quality solutions across the stack. Eager to expand my expertise in DevOps and cloud infrastructure management.

Technical Skills

Languages	C#, Java, JavaScript, SQL, Python, Rust, C++
Cloud/DevOps	AWS (ECS, EC2, RDS), Azure, Docker, Kubernetes, CI/CD
Frameworks	Spring, Angular, React, .NET, Node.js, React Native
Practices	Optimization, REST APIs, MVC, Database Design, Security Planning

Work Experience

Full Stack Developer

NC State University — Aug 2025 - Present

- Lead developer for major rework of a core feature, involving extensive research, design, documentation, and testing
- Identified and remediated bottlenecks in core queries, resulting in a 40% reduction in runtime
- Constructed an ETL pipeline to efficiently validate, transform, and stream raw data into a production database
- Refactored underengineered APIs to improve readability, security, and maintainability
- Mentor junior employees in design decisions, tooling, and best practices
- Regularly investigate and diagnose issues in AWS Cloudwatch, ECS, and RDS.

Full Stack Engineer

Dabbel Inc — Mar 2025 - Jun 2025

- Major contributor to architectural and design decisions across the technology stack
- Designed and implemented features in React Native and NodeJS
- Configured interactions with various web services, including CI/CD, cloud storage, auth

Education

University of North Carolina at Charlotte, Charlotte, NC | May 2024 (3.20 GPA)

Bachelor of Computer Science | Concentration: Software, Systems, and Networks

- Software Engineering, Cloud Computing, High Performance Computing, Database Design and Implementation, Operating Systems, Data Structures and Algorithms

Certificates

Microsoft AZ-900: Azure Fundamentals (Feb 2025)

Projects

Async Procedural Geometry FFI Library (Polyspheres)
- **Rust, Tokio, ASP.NET, React, BabylonJS**
- Designed and implemented a Rust library that performantly generates high quality seamless geometry for procedural polygon-tiled spheres, using a novel algorithm.
- Created a well-documented, user-friendly API exposed through FFI, allowing developers to use the library in any programming language or environment.
- Provided extensive documentation and code examples, including an ASP.NET server and web visualizer.

Cross-Platform P2P Messaging App
- **React Native (Web, Paper, WebRTC)**
- Developed a peer-to-peer chat app to allow seamless text and file transfer directly between devices.
- Implemented WebRTC ICE Handshake supported by a minimalist signal server to minimize reliance on third-party servers during communication.

3D Exoplanets Data Visualizer
- **React, BabylonJS, PostgreSQL, NodeJS, WebGPU**
- Designed and built a web-based 3D visualizer for data from the NASA Exoplanets Archive.
- Optimized rendering performance to performantly display thousands of stars in-browser.
- Used an ETL workflow to process data from multiple sources into a usable format.

Full Stack Image Ranking SPA (UNCC Capstone)
- **React, ASP .NET, PostgreSQL, Azure, Kubernetes, MUI, Docker, Entity Framework**
- Self-directed research, design, and E2E development of a full-stack web application.
- Architected a scalable, containerized deployment environment using Azure Kubernetes Services.
